

FEM codes (from Linear FEM Book) in Fortran

Disclaimer

The material included in this presentation was prepared to facilitate the learning of the subject matter by individuals (e.g., students, teachers, engineers, scientists, researchers). The author (JN Reddy) and his institution (TAMU) do not warrant that the information in this presentation is complete, true, accurate or non-misleading. Nothing in this presentation constitutes, or is meant to constitute, advice of any kind. **The author and his institution will not be liable to you** (whether under the law of contract, the law of torts or otherwise) in relation to the contents of, or use of, or otherwise in connection with, this material, for any business losses, loss of revenue, income, profits or anticipated savings, loss of contracts or business relationships, loss of reputation or goodwill, or loss or corruption of information or data.

One may distribute, remix, tweak, and build upon the works included herein, even commercially, as long as you credit the author for the original creation. By using this material, you agree that the exclusions and limitations of liability set out in this disclaimer are reasonable. If you do not think they are reasonable, you must not use this material.

Contents of Codes

Reference book: [An Introduction to the Finite Element Method, Third Edition, McGraw-Hill, NY, 2006.](#)

- **FEM1D – in Fortran** ([click to download the code](#))
Introduction to Computer Program FEM1D(Ch7)
Fortran Code: FEM1DF15.FOR
Examples: Example1.inp, Example2.inp, Example3.inp, Example3a.inp, Example4.inp, Example5.inp, Example6.inp, Example7.inp
[FEM1D – in MATLAB](#) ([click to download](#))
- **FEM2D – in Fortran** ([click to download the code](#))
Introduction to Computer Program FEM2D(Ch13)
Fortran Code: FEM2DF15.FOR
Examples: membrane.inp, 2DEXMPL.inp, FEM2DCNV.inp
[FEM2D – in MATLAB](#) ([click to download](#))
